

WHEN IT COMES TO LOWERING
THE COST OF BUS OWNERSHIP,
MAN IS THE SOLUTION

WHY?

Whether it's return on investment or offering flexibility for multiple applications within your fleet, MAN is up for the challenge.

For superior reliability performance, comfort and safety, MAN is essential to your business success.

THE MAN ESSENTIALS

LOW 'WHOLE-OF-LIFE' COSTS.

All smart business people are focused on the bottom line. That's why MAN is focused on delivering real results to your bottom line, with a bus range engineered for tangible success.

If experience and know-how play a fundamental role in your choice of partner, place your trust in MAN because with our chassis for bus bodies of all types, the crucial equipment comes as standard: maximum efficiency.

With extended scheduled service intervals, MAN's bus range represents an outstanding whole of life value proposition.

PROVEN RELIABILITY.

It goes without saying that MANs are built to be functional on the inside and sleek on the outside. Offering unparalleled comfort for drivers and passengers, MANs also deliver unrivalled reliability and fuel economy.

MAN's renowned reliability is a result of German development and engineering with the sole focus of providing a reliable and tough vehicle with low operating costs.

OUTSTANDING FUEL ECONOMY.

If you're looking for outstanding fuel economy, look no further than MAN.

Through advanced technology, designed with efficiency, performance, comfort, and reliability in mind, you can be completely confident in your choice of MAN.

Through common rail technology, MAN diesel engines combine high efficiency with economical fuel consumption. Add to this an additive-free Euro 5 exhaust emission solution and you have a bus range that gives you exceptional return on investment and improves your businesses bottom line. That's what makes MAN the only choice for savvy fleet operators.

A SMART CHOICE WITH LOW OPERATING COSTS

UNEQUALLED COMFORT.

MAN ticks all the boxes when it comes to comfort – and it's not an optional extra.

With easy-to-read instruments, logically arranged controls, and an all-round ergonomic design, the driver's comfort is paramount.

With a quick glance at the display, the driver can quickly assess their vehicle through on-board monitoring functions.

The four-spoke steering wheel can be pneumatically adjusted in height and inclination, and the whisper quiet MAN engine makes for a peaceful journey for the driver and passengers alike.

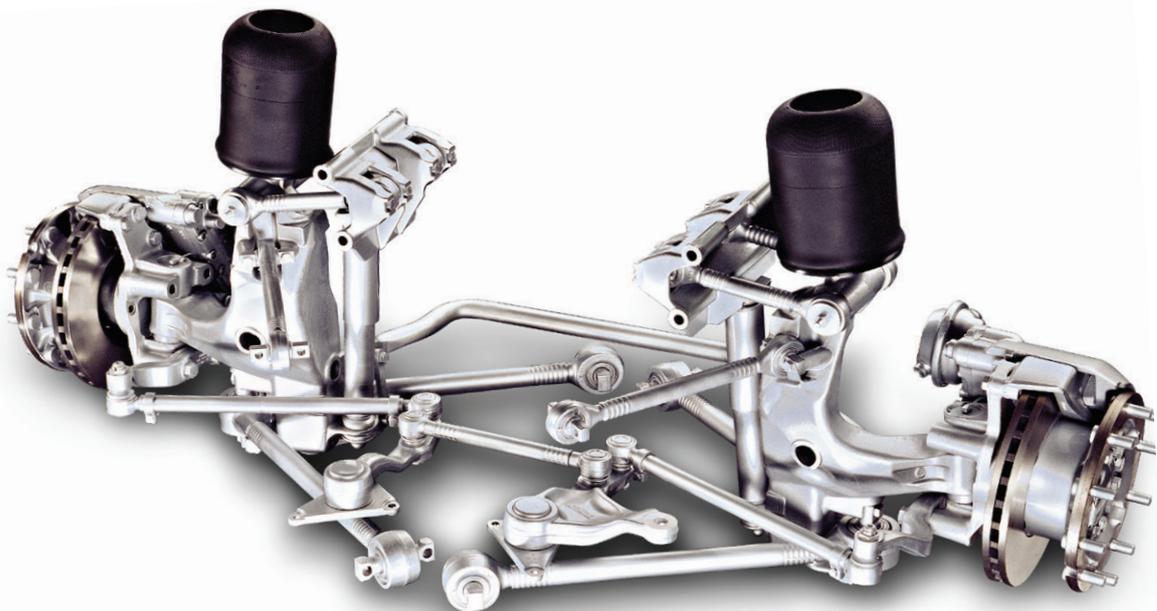

ENGINEERED SAFETY.

Underpinned by advanced German engineering, MAN means safety. With a host of safety features as standard, MAN is dedicated to delivering maximum protection on the road. An investment in an MAN is an investment in safety.

Other MAN safety features include:

- Electronic braking system (EBS) – guards against unpleasant surprises and reduces braking distances
- Brake assistant (BA) – braking with maximum possible brake force in a faster response time, thus reducing the braking distance before the pedal is fully depressed
- Anti-spin regulator (ASR) – prevents the driven wheels from spinning when or accelerating
- Anti-lock braking system (ABS) – prevents brake lock-up in individual wheels by pulsing the braking on the wheels with less grip
- Bremsomat brake control and Tempomat cruise control enable the vehicle to hold a preselected speed precisely, even on steep downhill gradients
- Adaptive cruise control (ACC) – maintains a constant distance from the vehicle ahead and lane guard system (LGS) – notifies the driver if the vehicle strays over the lane markings (both are available options)
- Electronic stability program (ESP) – stabilises the vehicle whenever it is at risk of skidding and keeps it safely in the lane (an available option)

NO COMPROMISES. NO EXCUSES.

Penske Australia is a leading supplier of the world's finest heavy-duty trucks, diesel engines, gas engines, and power systems.

Distributing the Western Star Trucks, MAN Truck & Bus, Dennis Eagle, *mtu*, Detroit, Allison Transmission, and Sauer Compressors brands, we operate across the most dynamic markets including on-highway and various off-highway industries such as mining, energy solutions, construction and industrial, rail, marine, oil and gas, agriculture, and defence.

Penske Australia also represents aftermarket products from leading oil, coolant, and filter brands.

In addition to distributing Western Star Trucks, MAN Truck & Bus, and Dennis Eagle, Penske Australia is also the appointed retail dealer of these brands across select locations providing full retail sales, service, and parts functions.

With over 1,000 employees, we are committed to providing the most comprehensive 24/7 aftersales support through a network of strategically located branches and field locations, and more than 100 dealers.

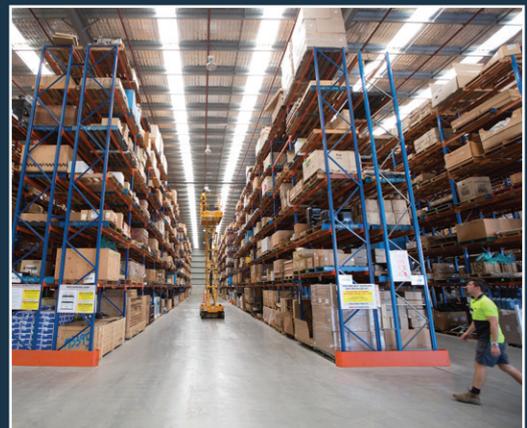

Penske Australia is a 100% subsidiary of Penske Automotive Group, a Fortune 500 company, which is listed on the New York Stock Exchange, and forms part of Penske Corporation.

No matter where your job takes you, there will be an MAN dealer nearby ready to help. Please scan the QR code for more information:
